PROFILE

I am a Web Developer with a solid technical background and hands-on experience in developing responsive web applications. I am proficient in PHP (Laravel), Angular, TypeScript, HTML, CSS, and JavaScript, always focusing on functional interfaces and usability. I am proactive, curious, and motivated, with a strong interest in joining agile teams and contributing modern and efficient solutions.

EXPERIENCE

GISGEO INFORMATION SYSTEMS, PORTO - NOV 2024 - ABR 2025

SOFTWARE DEVELOPER

- Developed the Rede Vizinha application from scratch in PHP using the Laravel framework, based on a client-provided concept.
- Responsible for developing a condominium management solution, including features such as real-time chat, announcements, Stripe payment integration, scheduling of common areas via calendar, password recovery via email, and reservation of shared spaces.
- Developed reusable components.
- Implemented backend functionalities with PHP (Laravel), including authentication, permissions, and integration with RESTful APIs.

- Used tools such as Git, Jira, and Figma for version control and application prototyping.
- Adopted agile methodologies (Scrum) and contributed to defining the application architecture.

PERSONAL PROJECTS – JUN 2023 - PRESENT

FRONTEND DEVELOPER

- Develop my professional portfolio and web applications using Angular, TypeScript, HTML5, and CSS3, focusing on performance, responsiveness, and accessibility.
- Create modern and interactive interfaces, applying best UI/UX practices to deliver optimized user experiences.
- Integrate RESTful APIs and use tools such as Git and Figma for version control and prototyping.
- Continuously enhance my technical skills through personal projects and learning new technologies.

CAPGEMINI ENGINEERING, LISBOA - MAR 2023 - JUN 2023

SOFTWARE ENGINEER

- Participated in the “Talent Factory” program, focusing on learning, improvement, and web development using Angular and React.
- Developed reusable components and consumed APIs for dynamic interfaces.
- Developed a web application using Angular for ticket purchasing, allowing filtering by location, event type, and adding tickets to a shopping cart.

MINSAIT, LISBOA - JUL 2021 - OUT 2021

LOW-CODE INTERN

- Assisted in the development of applications with OutSystems, focused on automating internal processes.
- Participated in creating prototypes, validation testing, and continuous improvement of the application.

EDUCATION

- Web & Mobile Development Course - CESAE Digital
- Frontend Web Development with Angular Course - ISCTE - Instituto Universitário de Lisboa - UPSkill Program
- Low Code Development with OutSystems Course - IPS - Instituto Politécnico de Setúbal - UPSkill Program

SKILLS

- **Front-end:** Angular, TypeScript, JavaScript (ES6+), HTML5, CSS3, Bootstrap, Tailwind
- **Back-end:** PHP, Laravel, MySQL, MariaDB
- **Tools:** Git, RESTful APIs, Postman, Figma, Vite
